Windows Setup

Select the operating system you want to install

Operating system	Architecture	Date modified
Windows Server 8 Beta Datacenter (Server Core Installation)	х64	2/18/2012
Windows Server 8 Beta Datacenter (Server with a GUI)	х64	2/18/2012

Description:

This option is useful when a GUI is required—for example, to provide backward compatibility for an application that cannot be run on a Server Core installation. All server roles and features are supported. You can switch to a different installation option later. See "Windows Server Installation Options."

Seleccionamos-> Custom: Install Windows only

Windows Setup

Which type of installation do you want?

<u>Upgrade</u>: Install Windows and keep files, settings, and apps The files, settings, and programs are moved to Windows with this option. This option is only available when a supported version of Windows is already running on the PC. X

<u>C</u>ustom: Install Windows only (advanced) The files, settings, and programs aren't moved to Windows with this option. If you want to make changes to partitions and drives, start the PC using the installation disc. We recommend backing up your files before you continue.
